Achievement

- Short term employment for the community
- Improved Nutrition for households
- Increased household earnings
- Improved soil productivity and improved environment
- Improved savings
- Improved hygiene and sanitation in the benefiting Households
- Group cohesion
- Community involvement and ownership
- Capacities of communities built to participate in Government Programmes

Challenges

- Bad conditions sometimes slow the process
- High demand for dairy projects by communities as an enterprise
- High prices for Dairy Animals
- Poor animal Husbandry and practices
- The roads need to be O&m

Recommendations

- **Community Development Officers , Veterinary officers and Agriculture Extension officers to continue monitor the investments for sustainability**
- **The sub counties should take over the operation and maintenance of the road infrastructure put in place by NUSAF3 using Road Funds**
- **More funding needed for more communities to benefit**

Conclusion

NUSAF3 project has greatly benefited and impacted the communities in terms of providing short term employment, increased incomes and assets in the households, the savings culture has also improved and exposure to the beneficiaries to access services from other Government programmes. the recommendation is that the government should adopt the NUSAF approach in providing services to communities
